OR38 REVERSIBLE MINI PLANER

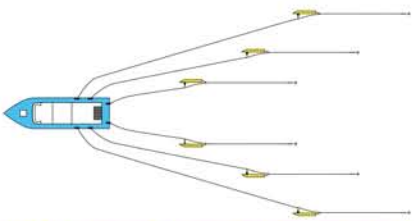

Great for All Species — Possibilities are Endless!

TROLLING MADE EASY!

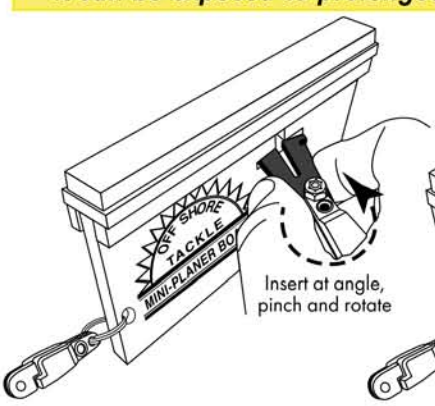

The Off Shore Tackle OR38 Mini Planer Board is simple to deploy and retrieve. The OR38 Mini provides excellent tracking without overpowering lighter rods and reels. Perfect for anglers of all skill levels, expand your trolling spread with the OR38 Mini! It is ideal for kayak fishing, targeting spooky fish in shallow waters and even fishing from the river banks. Its smaller profile offers less resistance and a more subtle presentation that will help you put more fish in the boat!

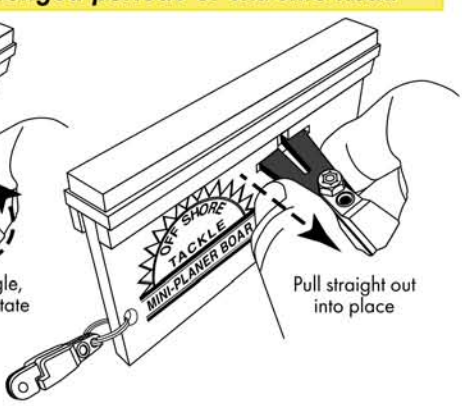

HOW TO USE YOUR MINI PLANER BOARD

The OR38 works for both port and starboard sides! It's that easy! One Board ... *Dual Purpose!*

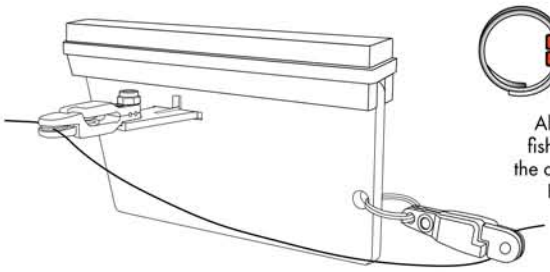

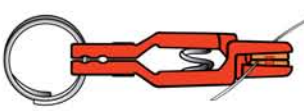

Due to the air chamber, DO <u>NOT</u> store planer board where it can be exposed to prolonged periods of extreme heat.

Assembly shown above is for running your board off your port side. Simply reverse the direction of the bracket to run the board off the starboard side as shown below.

Always make sure that the fishing line is placed behind the center pin on the red OR16 Pro Clip located on the tail of the board.

You can adjust the tension of the yellow OR10 release by sliding the spring as shown.

Heavy Tension

Light Tension

The pinch pad release/clip system allows you to easily attach and remove this board from your rod line. Simply let out your lure or light bait to your desired distance, place the line in the red OR16 Pro Clip and then into the pads of the OR10 release on the bracket. Continue to then let out your line to the final desired distance.
